### **Abstract for Lap Top Bible/Book Holder**

A lap top Plexiglas Bible/book holder is assembled having an expansion base with attached holder to hold book. The base has a right and left section made identically from the same mold. Side Plexiglas enclosure brackets are permanently attached to both outside edges of the left base top section. The enclosure brackets will allow the left and right base sections to interlock. The adjustable base will expand to properly fit over the user's lap, horizontally. The book support stand is permanently attached to the top side of the left base. The base can be completely dismantled for easy transport. The right side of the base may be used as a writing desk.
